

PRESS RELEASE

GALILEO GREEN ENERGY ANNOUNCES SENIOR APPOINTMENTS

- **Nikolaus MAINKA joins as CFO**
- **Eduardo GONZÁLEZ SOLÁ joins as Director for Power Origination Europe and Business Development Iberia**

MILAN, 28th JANUARY 2021. Galileo Green Energy (GGE), the new development and investment platform for renewable energy across Europe, is pleased to announce that Mr. Nikolaus Mainka has joined the Company as Chief Financial Officer and Mr. Eduardo González Solá as Director for both Power Origination Europe and Business Development Iberia.

The two senior appointments further complement the executive management team which is being built by Ingmar Wilhelm, CEO, for the platform created in 2020 with its registered office in Zurich and the operational headquarters in Milan.

“I am very happy that Nik and Eduardo are joining Galileo Green Energy during this early phase of our platform. The international track record and very complementary sector expertise of Eduardo and Nik will have an immediate positive impact on our project development, power origination and sales as well as financing capabilities. Furthermore, we are creating a team of truly European reach and cultural fit which will be very effective as we are making a significant contribution to reaching Europe’s green energy targets over the coming decade”, says Ingmar Wilhelm.

“It is great to be part of a newly formed team with such an impressive professional track record and the mandate and capabilities to structure tailor-made solutions for project development as well as for commercialising and financing renewable assets. I’m very much looking forward to contributing all my experience to help establish GGE as a leading renewables platform for Europe”, commented Nikolaus Mainka who previously was Head of Investments at the international solar PV operator Enerparc based in Hamburg and before had worked as CFO of Adapture Renewables in the US.

“The combination of competitive project development and suitable offtake solutions is essential to produce attractive investment options. I’m excited to contribute my professional experiences in these areas and help form a team of complementary skills and great entrepreneurial spirit” added Eduardo González Solá who previously was Global Head of Power Origination at Madrid-based Acciona Energia and before had worked in business development roles with EDF Energies Nouvelles and Fotosolar.

Short bio of Nikolaus Mainka**Chief Financial Officer**

Nikolaus Mainka has joined Galileo Green Energy as Chief Financial Officer in January 2021.

Nikolaus (Nik) comes with over 12 years of experience in building solar photovoltaic development and IPP platforms in Europe and the US. Before joining Galileo Green Energy, he led international investment and financing activities at Enerparc, one of Europe's leading solar developers and IPPs. During this time, he closed several innovative financings, among them the largest mezzanine transaction in solar to date, and he was driving Enerparc's capital market strategy.

Previously, Nik worked as CFO for Adapture Renewables, a California based solar developer and IPP operating in over ten states across the US. As an original member of the team and shareholder, his contributions were crucial in building the platform and managing investors until finally a majority stake of Adapture Renewables was sold to Kirkbi, the LEGO family's private investment company.

Nik had started his career at Enerparc where he joined the founding members of the company right after inception. He was responsible for setting up Enerparc's corporate governance, controlling and financial modelling capabilities.

Nik holds a Master's Degree in Economics from University of Regensburg, is married and has 2 children. Nik is fluent in German and English.

Short bio of Eduardo González Solá**Business Development Director Iberia & European Power Origination Director**

Eduardo has joined Galileo Green Energy as Business Development Director for Iberia and Power Origination Director for Europe in January 2021.

Eduardo has 20 years of business experience of which 12 years was in the renewable energy sector, with several leadership roles in business development and power origination at an international level.

Before joining Galileo Green Energy, he led the global power origination efforts at Acciona Energia, contracting and supporting large energy consumers in meeting their renewable targets in over 20 countries. Previously, Eduardo worked at EDF Energies Nouvelles, with management roles covering business development and an early set of European long-term PPA transactions.

Eduardo holds a Business Administration Degree with a Major in Finance from Universidad San Pablo CEU of Madrid, an Executive MBA from Instituto de Empresa and participated in the Advanced Management Program of IESE. He is married with 3 children and speaks Spanish, Catalan, English and French.

About GGE

Galileo Green Energy (GGE), has been created with an industrial view on the energy sector in which the combination of four key skills makes the difference in successfully addressing the new era of renewables: competitive development of projects, sale of electricity to final consumers, energy management and innovative financing solutions.

With this view in mind, Ingmar Wilhelm, business developer and entrepreneur in the world of renewables and the energy transition, and the international investment manager Morrison & Co, with their deep experience in the sector of infrastructure and renewable energy both in private and listed markets, have created the new GGE platform in February 2020.

GGE is a company with a long-term view on the energy market which has gathered financial support from four major Australasian investors.

Two are from Australia: the Commonwealth Superannuation Corporation (CSC), which has over 30 years' experience in providing superannuation services to employees of the Australian Government and members of the Australian Defence Force; and Morrison & Co Growth Infrastructure Fund (MGIF), a vehicle managed by Morrison & Co, established in 2018 to provide institutional and high-level investors with access to investments in unlisted and sustainable infrastructure assets.

Two further investors are from New Zealand: Infratil Limited, an infrastructure investment company listed on both the New Zealand and the Australian stock exchanges, which owns renewable energy, airport, data & connectivity and social infrastructure businesses; and the New Zealand Superannuation Fund (NZ Super Fund), a sovereign wealth fund established by the New Zealand government to help pre-fund the future cost of superannuation.

GGE has been provided an initial capital commitment of €220 million, with Infratil contributing 40%, and CSC, NZ Super Fund and MGIF contributing 20% each.
